MESSAGE FROM THE VICE PRESIDENT

The world is evolving at a rapid pace and we are witnessing unprecedented changes all around us.

Keeping in sync with the evolving socio-economic milieu, on the horizon industry trends and dynamic demands from a global and digital society, Suryadatta Group of Institutes has embarked on a path that reinvents itself into a 21st century academic conglomerate that touches several aspects of lives of the student community and contributes to their overall well-being.

As a group we are integrating ourselves more closely with the wider academic, entrepreneurial, industry, policy making and social ecosystem. We have taken several steps in this direction. One of these steps include, spreading our wings in the Health Sciences industry. We hope to provide well trained well groomed knowledgeable physiotherapists to our society to further fulfill our dream of enriching our society. For this purpose, Suryadatta Institute of Health Sciences (SIHS) - College of Physiotherapy is Affiliated to Maharashtra University of Health Sciences (MUHS), Nashik.

We firmly believe that skilled and well educated human talent is merely one of the many facets of consistent and sustainable national development. This must be supplemented with human and moral values as well as a healthy mind, body and soul. Right since our inception, we have never lost sight of our commitment to the society. Our students are imbued with the right personal and social values and are sensitised towards various facets of social and public life. As a group we have gone beyond our formal responsibility of curriculum delivery to inculcating best practices that lead to healthy and empathetic human beings. Excellence, to us, is not a destination but a continuous journey. We shall not be content with the accreditations and ratings received and the awards bestowed upon us, but shall continue our march towards a socially responsible and digital society with a global outlook.

REHABILITATION

ABOUT PHYSIOTHERAPY

According to the **Chartered Society of Physiotherapists, London, United Kingdom:**

Physiotherapists help people affected by injury, illness or disability through movement and exercise, manual therapy, education and advice. They maintain health for people of all ages, helping patients to manage pain and prevent disease. The profession helps to encourage development and facilitate recovery, enabling people to stay in work while helping them remain independent for as long as possible.

A physiotherapist, or physical therapist, works with patients to help them manage pain, balance, mobility, and motor function. This can also help to reduce your risk of injury or illness in the future. Physiotherapy takes a holistic approach that involves the patient directly in their own care.

PHYSIOTHERAPY

Physiotherapy (P.T.) is a movement science with an established theoretical and scientific base and widespread clinical applications in the:

Prevention

Restoration

Rehabilitation

Maintenance

Promotion of optimal
physical function

- Physiotherapy with its non-pharmacological and exercise oriented approach, plays an important role in rehabilitation.
- Physiotherapy has ample scope due to its application in various areas of treatment of many diseases, rehabilitation and exercise.
- It is rapidly gaining popularity due to its effective results without no side effects.

PHYSIOTHERAPISTS' APPROACH

Physiotherapists consider the body as a whole, rather than just focusing on the individual aspects of an injury or illness.

They take a holistic approach, addressing not only the physical aspects of your well-being, but also your emotional, psychological, and social well-being.

- They work at all stages of healthcare, including prevention, education, intervention, rehabilitation, and treatment.
- A physiotherapist works with patients to develop customized programs designed to restore as much as possible their functional ability and movement.

They are trained to help patients at all stages of life — from infant to old age — whose function and movement are impacted by:

Some of the main approaches used by physiotherapists include:

Education and advice:

Physiotherapists can give general advice about things that can affect your daily lives, such as posture and correct lifting or carrying techniques to help prevent injuries.

Movement, tailored exercise and physical activity advice:

Exercises may be recommended to improve your general health and mobility, and to strengthen specific parts of your body.

Manual therapy:

Here the physiotherapist uses their hands to help relieve pain and stiffness, and to encourage better movement of the body.

- Basically, physiotherapy can involve a number of different treatments and preventative approaches, depending on the specific problems you are experiencing.
- Other techniques such as exercises carried out in water (hydrotherapy or aquatic therapy), ultrasound therapy, LASER therapy, Kinesiotaping, etc. which are used to alleviate pain & facilitate function.
